

Manufacturing Engineer

Hamilton Associates, a diverse, growth-oriented, Lean-driven, ISO-Certified manufacturing company is currently seeking a **Manufacturing Engineer** to join our team. For additional information about our Company and each of our divisions and our product lines, please visit our websites at www.hamiltonassoc.com, www.elscoguides.com, www.atitest.com, and www.dirtkiller.com.

Air Techniques International (ATI), a division of Hamilton Associates, Inc., is the leading designer and manufacturer of specialized test equipment for HEPA and ULPA filters, flat sheet media, filter cartridges and respirators used by virtually all government, military and commercial organizations worldwide. ATI strives to build a brand identity of being known as reliable and easy to work with. Our Customer Service team plays a key role in this strategic goal to establish and engrain that desired brand identity. To help support this desired brand and succeed in achieving our strategic business goals, the company is building an organizational culture of teamwork, engagement, learning, and continuous improvement/innovation.

POSITION OVERVIEW

We are looking for a **Manufacturing Engineer** to join our growing Operations team and help us drive process improvements, cost reductions, and new product introductions. This person must be at ease working in an agile environment and should embody a passion for continuous improvement and test-driven development. The **Manufacturing Engineer** must be self-directed and take initiative to meet business challenges. The **Manufacturing Engineer** must develop and maintain expert-level competency in the operation of all ATI products.

Responsibilities include, but are not limited to:

- Create and maintain product documentation such as OMSs, BOMs, and component drawings.
- Participate in Material Review Board (MRB) meetings, disposition defective material and perform scrap analysis.
- Lead value engineering activities and propose product and process improvements to reduce total direct cost of all product lines.
- Become expert at the assembly of all product lines and become the primary trainer for production staff on assembly processes.
- Specify, design and source assembly tools and equipment.
- Provide technical support to supply chain management team in identifying and qualifying new suppliers.
- Review requirements documents, participate in DfX & design reviews, and develop operations plans for new products as part of the stage gate product development process.
- Act as Operations lead for all new product introduction efforts. Serve as the manufacturing engineering team member on new product development teams.
- Lead lean manufacturing kaizen events, participate in industry peer groups and champion ATI's lean manufacturing initiatives.
- Perform other duties as assigned.

Minimum Background and Skills Required:

- Bachelor's degree in Mechanical Engineering, Industrial Engineering or equivalent Engineering discipline.
- 5+years or more related manufacturing engineering experience.
- Expert knowledge of lean manufacturing principles such as 5s, Kaizen, Heijunka, JIT, one-piece flow, Poka-Yoke, Jidoka and elimination of 7 wastes.
- Familiarity with a wide range of additive and subtractive manufacturing processes, such as casting, injection molding, vacuum forming, machining, sheet metal work, and/or rotational molding.
- Proficiency with 2D/3D CAD platforms such as Solidworks, Inventor and/or AutoCAD.
- Excellent verbal and written communication skills to communicate effectively and collaboratively with all levels of colleagues and customers.
- Expert in MS Office Suite and Excel in particular.
- Ability to demonstrate high degree of initiative and work effectively in a flexible and changing work environment, both independently and within teams.
- Ability to travel domestically and internationally approximately 3-4 times/year for approximately one-week intervals.

Additional Background and Skills Preferred:

- Six Sigma experience a plus.
- Experience in Design for Manufacturability, Design for Assembly and Design for Service.
- General understanding of regulatory standards, including OSHA, CE, UL, ISO 9001, ISO 17025, ISO 45001.
- Strong knowledge in SPC, e.g. X-bar R charts, GR&R, process capability, ANOVA.
- Proficiency with PowerPivot and PowerBI a plus.

PHYSICAL REQUIREMENTS AND WORKING CONDITIONS

- Occasional Sedentary Work
- Frequent Standing
- Lifting to 35 pounds repetitively
- Walking
- Speaking
- Hearing
- Visual Acuity

COMPENSATION & BENEFITS

We offer an attractive compensation package in addition to a comprehensive benefits program including health insurance, 401(k) plan with matching and profit sharing, generous paid time off (PTO) policy, life & disability coverage, plus much more!
