## iProbe Plus Firmware Installation Instructions

The iProbe Plus Probe allows the user to easily update firmware to the latest revision. The unit does NOT need to be sent to ATI or an ATI Authorized Service Center, it can be done locally.

To update the iProbe Plus firmware, execute the following steps:

1. Download the firmware to a computer:
  - a. Direct ATI Customers and non-service provider distributors can download the firmware from the ATI website: <https://www.atitest.com/products/2i-iprobe-plus/>. Go to the FIRMWARE tab to download the firmware file.
  - b. Service Provider Distributors can also download the firmware through the Distributor Portal

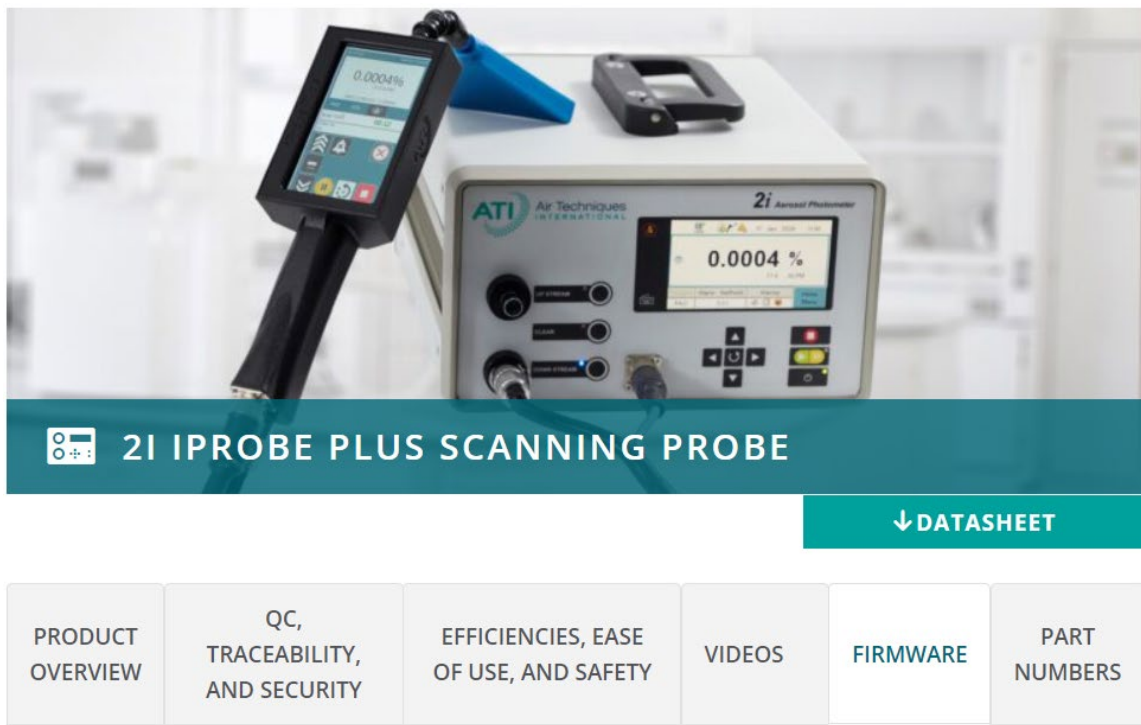

Figure 1. Firmware TAB on the iProbe Plus webpage

2. Copy the Firmware file to the root directory of a USB-A Memory Stick, Figure 2.

Name	Date modified	Type	Size
 iProbe_Plus-1-1.0.0.46_0_20240521_1301.pfu	5/22/2024 8:19 AM	PFU File	2,908 KB
